Profile

Passionate Android Developer that thinks that android apps can, and must, be the most beautiful mobile applications. 8+ years of full-time Android Development experience.

Former Android Google Developer Expert (GDE) and Public Speaker on a lot of national and international conferences.

Before that I've spent 10 years designing and developing Basic Systems in C and C++, having worked on large projects focusing in high-availability and network performance.

Highly self-taught person with ability to learn and develop skills quickly. Enthusiast in complex challenges and creating/developing solutions.

Experience
